I understand that spray tanning is a cosmetic service that involves the application of a topical solution designed to temporarily darken the appearance of the skin.

-I understand that spray tanning does not provide UV protection and does not replace sunscreen.

-I acknowledge that results may vary based on skin type, preparation, and aftercare.

-I understand that improper aftercare may affect the longevity or appearance of the tan. It is suggested to follow Copper + Fringe aftercare suggestions for best results.

Copper + Fringe will NOT take any photography of a minor before, during or after the session. However, if you'd love to tag us or share any photos of you enjoying your custom tan, we'd love that!
